THE CREATIVITY IN CHARACTER CONTENT

For over 20 years, a team of innovative young individuals have been working on perfecting an iconic range of techniques and formulas specially designed for Middle Eastern Pro makeup artists.

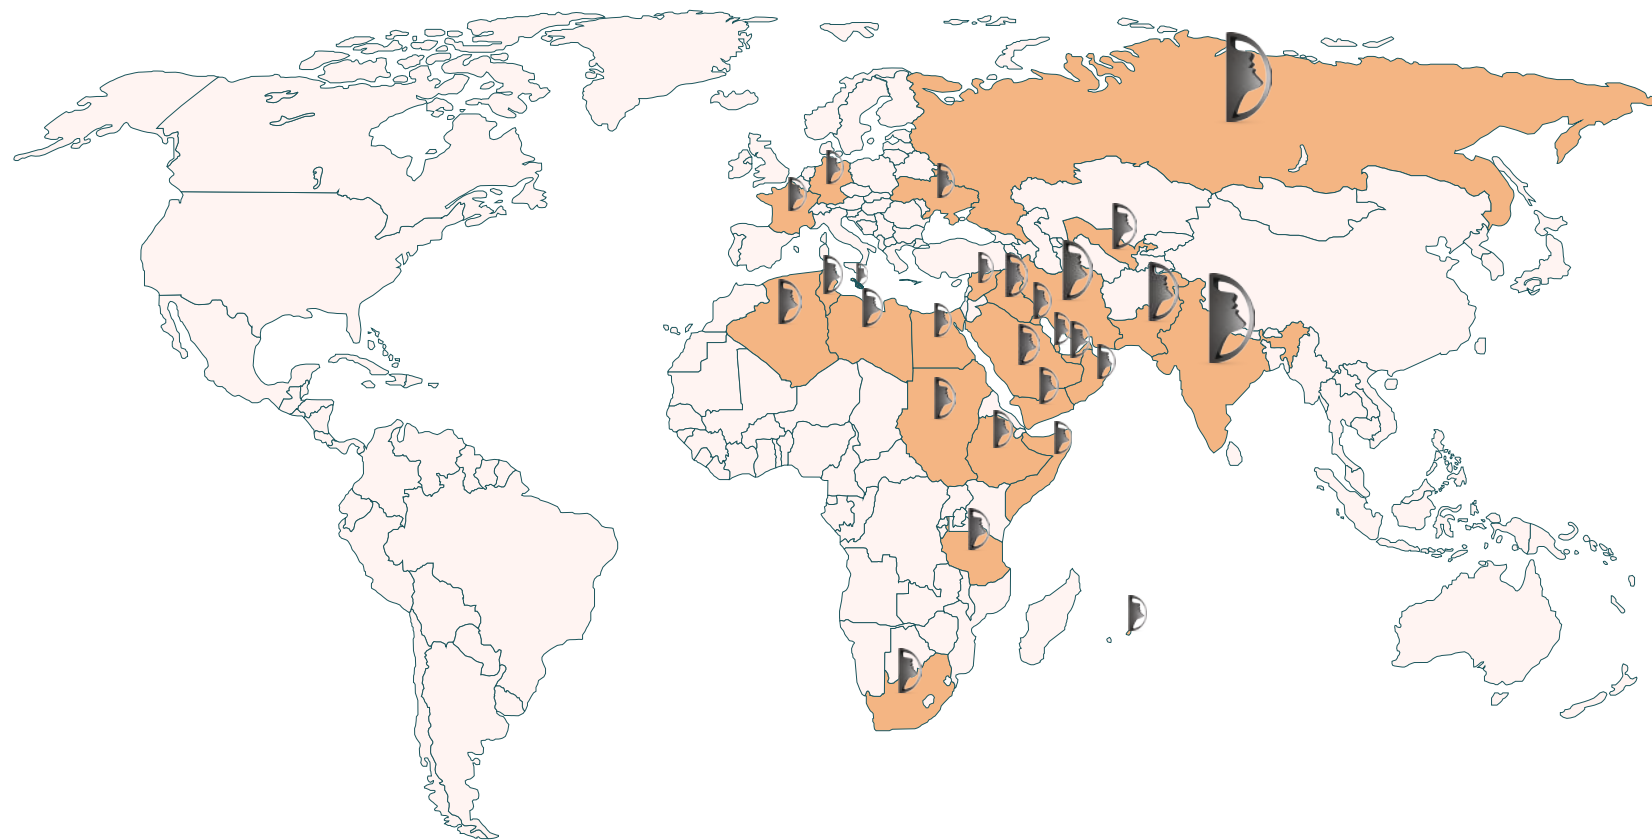

Being a color cosmetics company, the team has a unique skill set to personally develop never-before-seen formulas made of the highest quality ingredients available. Exploding into the market, the semi-luxury line of trend-setting products has quickly achieved cult status in the Middle Eastern beauty market.

Designed for professional makeup artists and makeup enthusiasts alike, these groundbreaking formulas are at the forefront of modern beauty.

In 2019, the team made the decision to rebrand 360 Degrees with a new look and innovating chic yet luxury makeup products for makeup artists with medium-high spending power. The team then changed the traditional marketing strategy completely with the aid and support of influencer marketing.

To date, the brand has collaborated with over 100 Middle Eastern makeup artists and influencers. Character Cosmetics' brand experienced a blessing in disguise as a result of the pandemic. The brand developed a following of its own and grew on all online marketplaces, including Boutikaat, Faces.com, Brandatt, and many others. The influencers played their part in spreading awareness and making promotions, but the quality of the items is what drew in and grew the consumer base. The products' USP, usability, colors, textures, etc. helped emphasize how every product had a unique tale to tell.
